

System downtime, viruses, spyware, losses of productivity...

...are your computer systems working consistently and as expected?

**Proactive Management
and Support for Your
Computer Networks**

TechCare is a remote and automated systems management solution from **LBMC Technologies** that allows our Microsoft® certified network engineers to proactively manage your IT environment. Through this proactive and cost-effective approach to managed services, **LBMC Technologies** is able to provide enterprise-level monitoring and preventive network maintenance to our customers for a fixed monthly fee.

“TechCare gives me a comprehensive and proactive IT support plan with fixed monthly fees. Whether providing onsite or remote support, I pay one fee and LBMC Technologies handles everything. Allowing my folks to focus on their core responsibilities has increased productivity and morale.”

TechCare provides best practices for:

- Spyware & Virus Protection and Removal
- Disk Drive Analysis
- Security Patch Management
- Backup and Disaster Recovery
- User Policy Enforcement
- System Auditing
