- One Price
- 1-2 Dashboards
- 3-5 Reports
- Ad-Hoc Reporting
- BI Roadmap
- Training

Big Data. Self Service BI. Data Analytics. Dashboards. Reports. Business Intelligence Strategy.

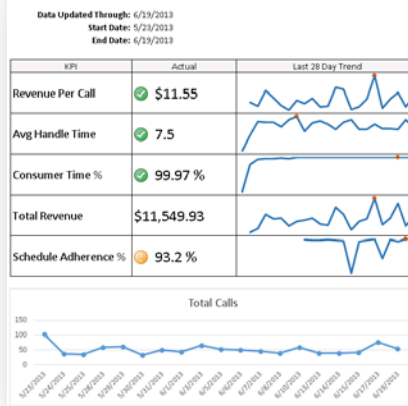

You've heard these terms and wonder where to begin. You know you have plenty of data but don't know how to get useful information from it.

To be successful in today's competitive landscape, you must be better than the competition by making informed business decisions.

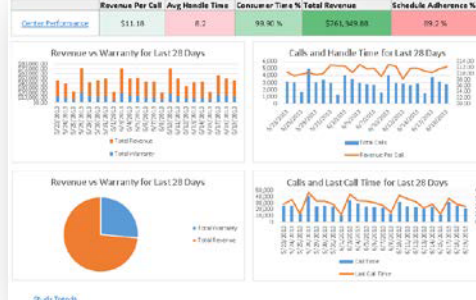

How do you do this without adequate insight? Data is the key. Let us help you turn this data into actionable insight.

How? Leverage the technology you already have...with Excel*.

Excel and PowerPivot

Yes, that's right. Big Data using the tools you have grown to love. Ad-hoc reporting, built for speed. 100's of millions of rows? No problem. This is the Modern Excel, built for Big Data and Self Service.

Our team will design a reporting model based on your requirements, build a set of dashboards and reports to your specifications, and provide a solid roadmap based on years of experience providing strategic Business Intelligence consulting to organizations across a multitude of industries. Why wait? Start now!

DATA → **INSIGHT** → **ACTION**
