# MICROSOFT POWER BI

## What is Power BI?

---

Power BI is a business intelligence tool created by Microsoft with an unlimited use for analyzing, visualizing and sharing data.

With it, you can easily connect to, model, and visualize data to help your company make data-driven decisions.

## Reports & Dashboards

---

The many possibilities include capacity planning sales, shipping, inventory control, as well as comparing revenue and expenses to budgets and forecasts.

### FREE DEVELOPMENT TOOL

Connect to file and database data sources, plus Azure and online services such as SharePoint and Dynamics with the free PBI gateway tool.

### MULTIPLE DATA SOURCES

Build interactive dashboards and reports with multiple data sources, such as Excel, SQL, and Xml.

### DESKTOP & REPORT BUILDER

Power BI desktop is a powerful interactive data visualization tool. Power BI Report Builder creates paginated reports which are designed to be printed or shared.

## Your Consultant

---
